## Summary

I'm a self-taught software developer. With a total of 4 years of development experience and over one year of professional experience. My most relevant skill is javascript and React.js. I also use Python for backend REST APIs and machine learning practice.

I constantly stay learning and keeping up with new technologies. I'm currently learning DENO and different ways to utilize python.

## Experience

### Covid-19 Global Hackathon

Devpost

Mar 2020 - Mar 2020 (1 month)

I participated in a hackathon during the beginning of the Covid-19 pandemic. I teamed up with some great people to build an application that would connect wholesale distributors with local vendors to help move supply that has been interrupted by the broken logistics chain.

I took care of the React front end. I scaffolded out a file architecture and setup the github repository. I used Material UI for quick UI ideas.

### Software Developer

Beachfront

Jun 2019 - Present (1 year 2 months +)

I Work on a variety of tasks that include frontend, backend, and creating miscellaneous services. Frontend tooling includes Node.js, React.js and the various libraries commonly used.

I occasionally would make different API endpoints and services in a Java backend as well.

My greatest accomplishment was creating an internal tool used for reporting. I did this with a React frontend and a Node.js backend that communicated with another internal API for stats.

### Customer Service Team Lead

Publix

2017 - 2018 (2 years)

I managed the frontend team and coordinated tasks to service associates. It was also my responsibility to perform payroll and new hire paperwork. I would occasionally take on extra special campaign projects that the store would participate in.

## Education

### **Team TreeHouse**

full stack web development

### **freeCodeCamp**

full stack web development certification, Computer Software Engineering

2017 - 2018

### **Udemy**

Full Stack Web Development

## **Licenses & Certifications**

### **The Complete Web Developer in 2018: Zero To Mastery - Udemy**

### **Javascript Basi - HackerRank**

BA07DCDEB771

### **Python Basic - HackerRank**

7B2517DE96D1

### **Creating Python APIs Like a BOSS - The Django REST Framework - Udemy**

UC-789f3849-a570-4903-a4e4-356a45655c06

## **Skills**

JavaScript • React.js • Node.js • Responsive Web Design • HTML • Cascading Style Sheets (CSS) • Bootstrap • MongoDB • HTML5 • Python (Programming Language)
